

PRE-VOCATIONAL TRAINING PROGRAMS

NO-COST TRAINING OPPORTUNITIES!

3D Digital Fabrication

The 3D Digital Fabrication program prepares individuals to enter the high growth manufacturing industry in an entry-level engineering assistant position. In this no-cost program, students will learn how to move their designs from a model to a manufactured part via 3D printing. Participants that successfully complete the program will receive:

- Job referrals to local manufacturers for interviews;
- will have over 40 hours of hands-on lab work on a variety of 3D printers;
- and will have started a pathway to obtain a Solidworks certification.

Certified Production Technician

The Certified Production Technician program prepares individuals for front-line production work in manufacturing and the opportunity to earn a nationally recognized certification. Training consists of classroom and hands-on lab learning at no-cost to you. **A High School Diploma is not required to enroll.** Participants that successfully complete the program will receive:

- Job referrals to local manufacturers for interviews;
- earn the Manufacturing Skills Standards Council (MSSC) Certified Production Technician credential.

Construction

Earn nationally recognized NCCER Core Curriculum and OSHA 10 certifications. Training modules will offer applied experience in trades such as Carpentry, Electrical, HVAC, Masonry, and Plumbing & Pipefitting. Successful participants are referred to local construction employers and apprenticeship programs for direct hire, apprenticeship program enrollment, paid work experience, or on-the-job training opportunities.

** Eligibility requirements apply for the Pre-Vocational Training Programs.*
